

SMALL-SCALE INFRASTRUCTURE

Every 21 seconds, a child dies globally from water-related illnesses due to water contaminated by fecal matter – because many families still lack toilets.

It is also common in the Philippine countryside to hold classes under trees or makeshift classrooms due to lack of facilities.

Providing better facilities can help improve socio-economic, health and nutrition status of every Filipino household. Some 16% of Filipino households lacked access to clean and potable water, and at least 55 individuals die daily due to lack of proper sewerage.

Under the Small-scale Infrastructure Sector, development assistance from overseas Filipinos are directed towards building much needed classrooms, potable water systems, renovating barangay halls and health centers. Donors can also fund other projects like low-cost housing, sports & cultural facilities, grain dryers, waiting sheds, short bridges for creeks, etc.

Help in the construction of facilities needed for the improvement of day-to-day life.

Your.....

- **US\$ 13,000** can build a standard 7m x 9m classroom and help provide students an area conducive to learning.
- **US\$ 1,300** can fund a water system can provide communities with safe drinking water. Water systems normally include wells with pumps, reservoirs, and elevated tanks. With clean and readily available water, communities can better maintain sanitation and combat sickness.
- **US\$ 3,200** can also build a housing unit for one family to dwell.

TO SUPPORT THIS SECTOR, PLEASE FILL UP AND CLIP-OFF THE REPLY PORTION AT THE BACK OF THIS PAMPHLET AND SEND BACK TO THE COMMISSION ON FILIPINOS OVERSEAS.

Yes!

I am interested in donating in the
Small-Scale Infrastructure Project

Amount of Donation

Intended for: Classroom Building Water Well Housing Units
